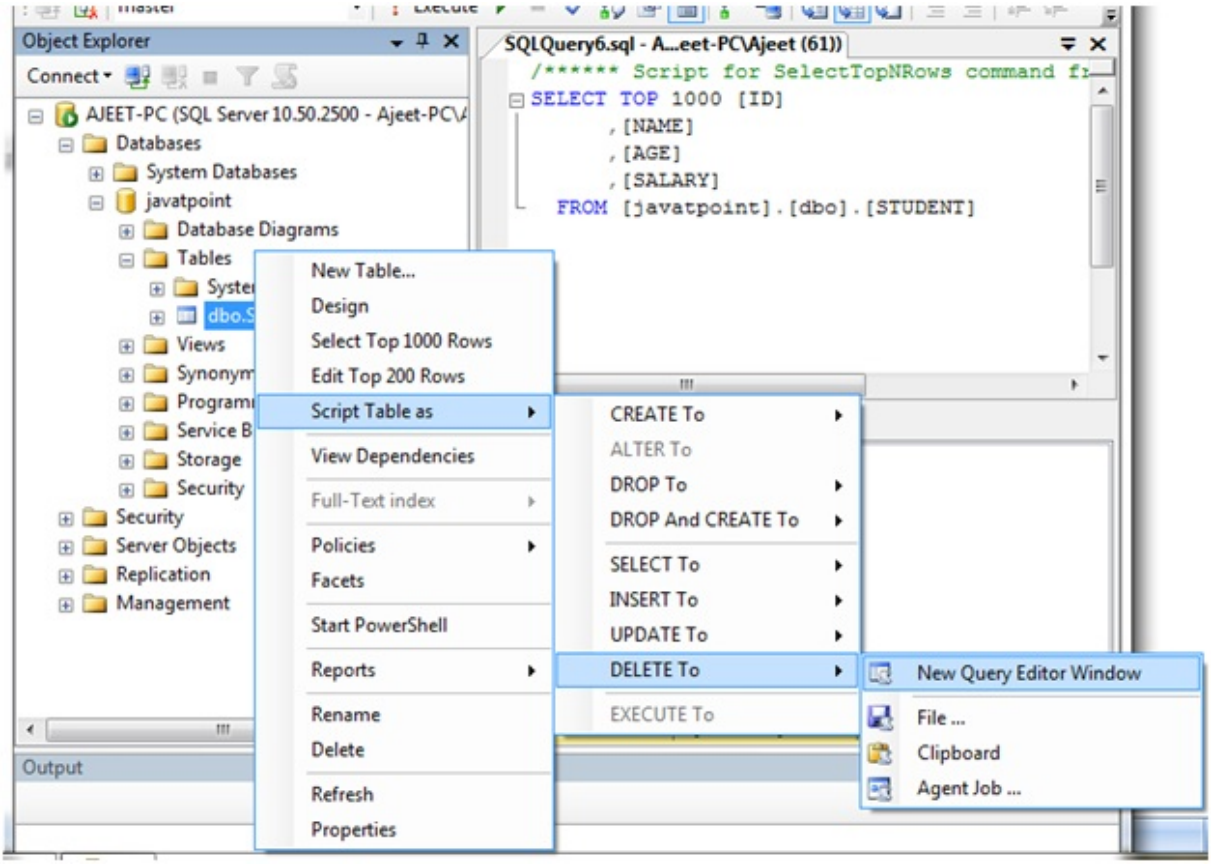
SQL Server DELETE Data

javatpoint.com/sql-server-delete-data

In SQL Server database, DELETE statement is used to delete records from the table.

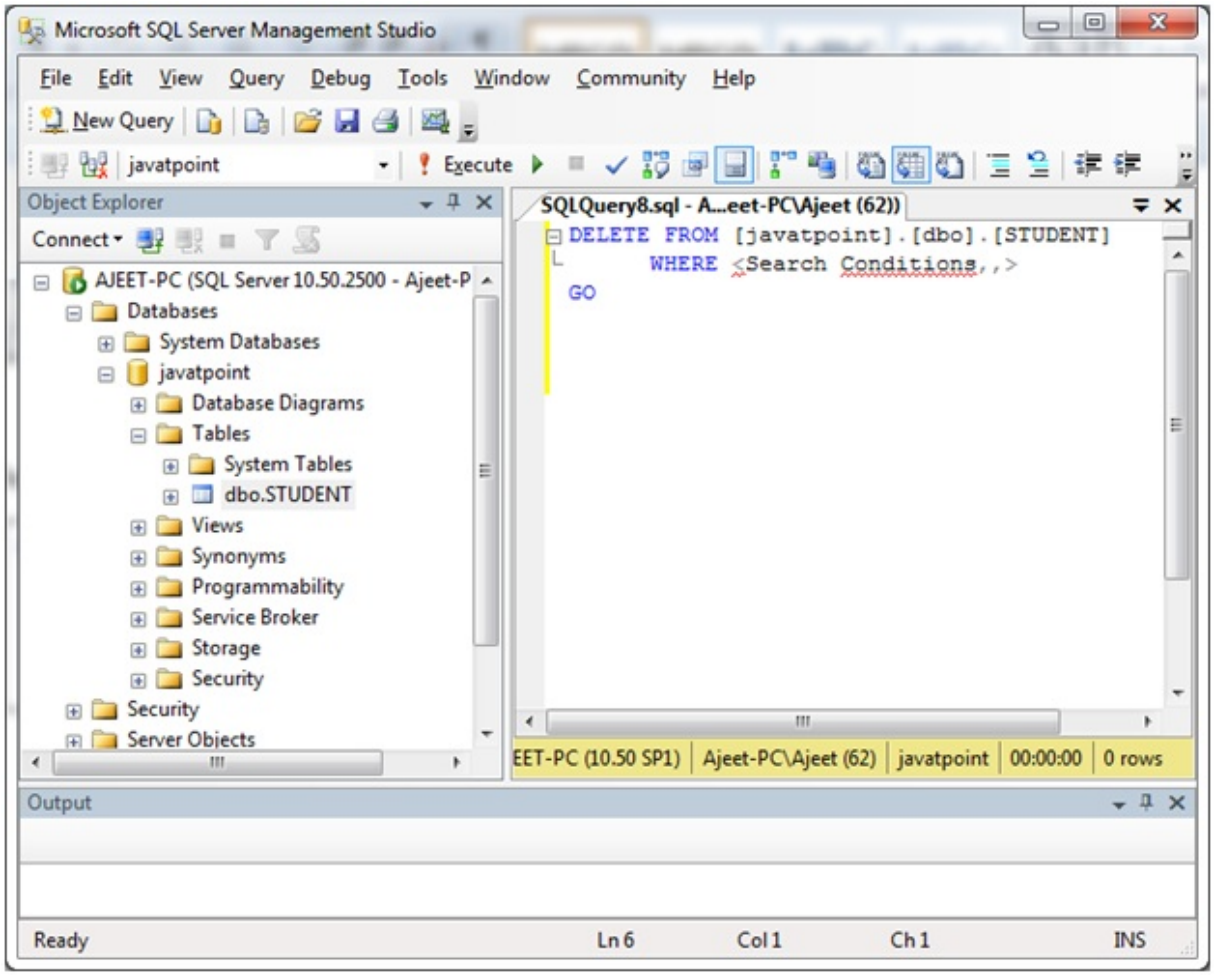


Syntax:

```
1. SELECTTOP 1000 [ID]
2.       ,[NAME]
3.       ,[AGE]
4.       ,[SALARY]
5.   FROM [javatpoint].[dbo].[STUDENT]
```

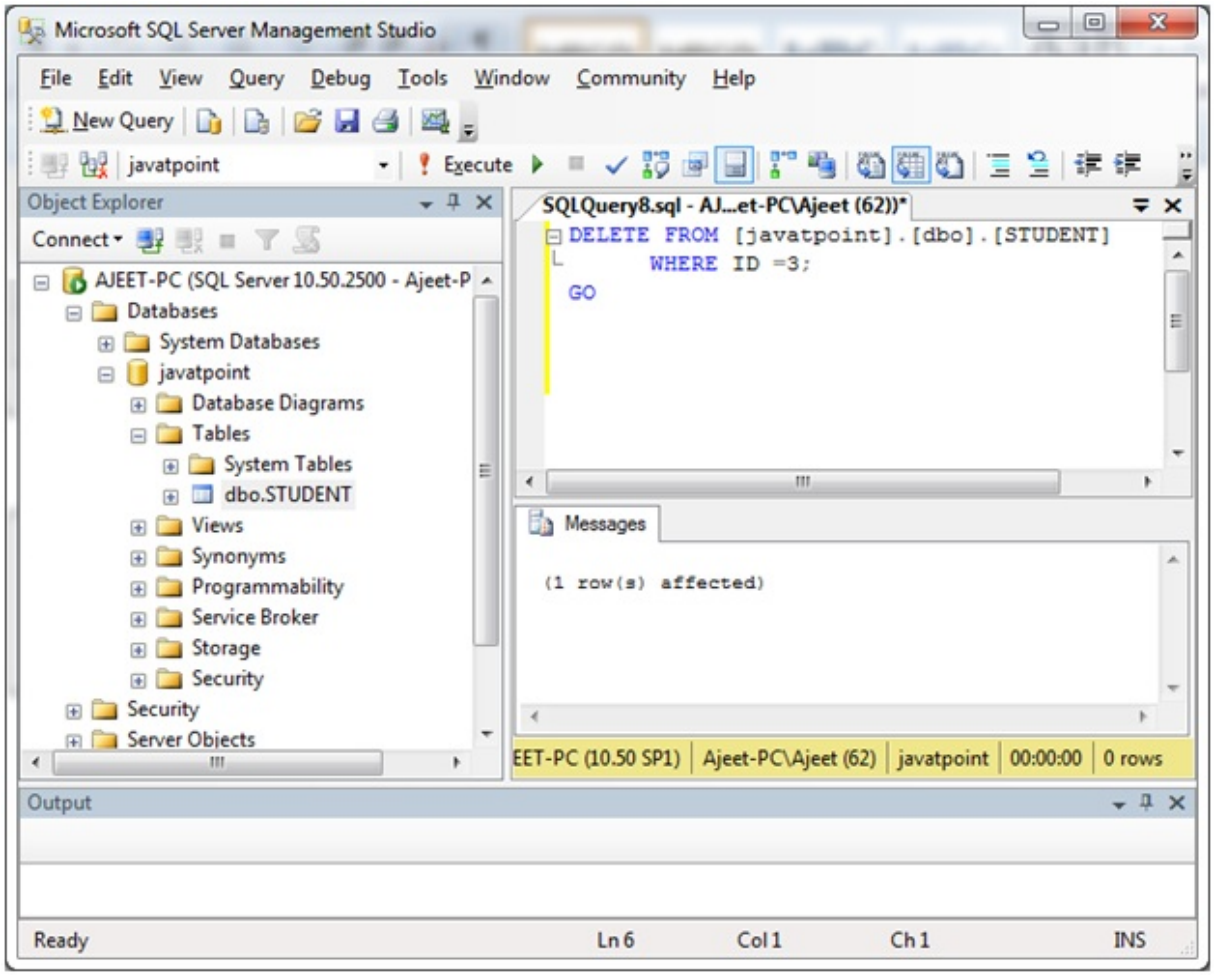
Use the SQL Server management Studio:

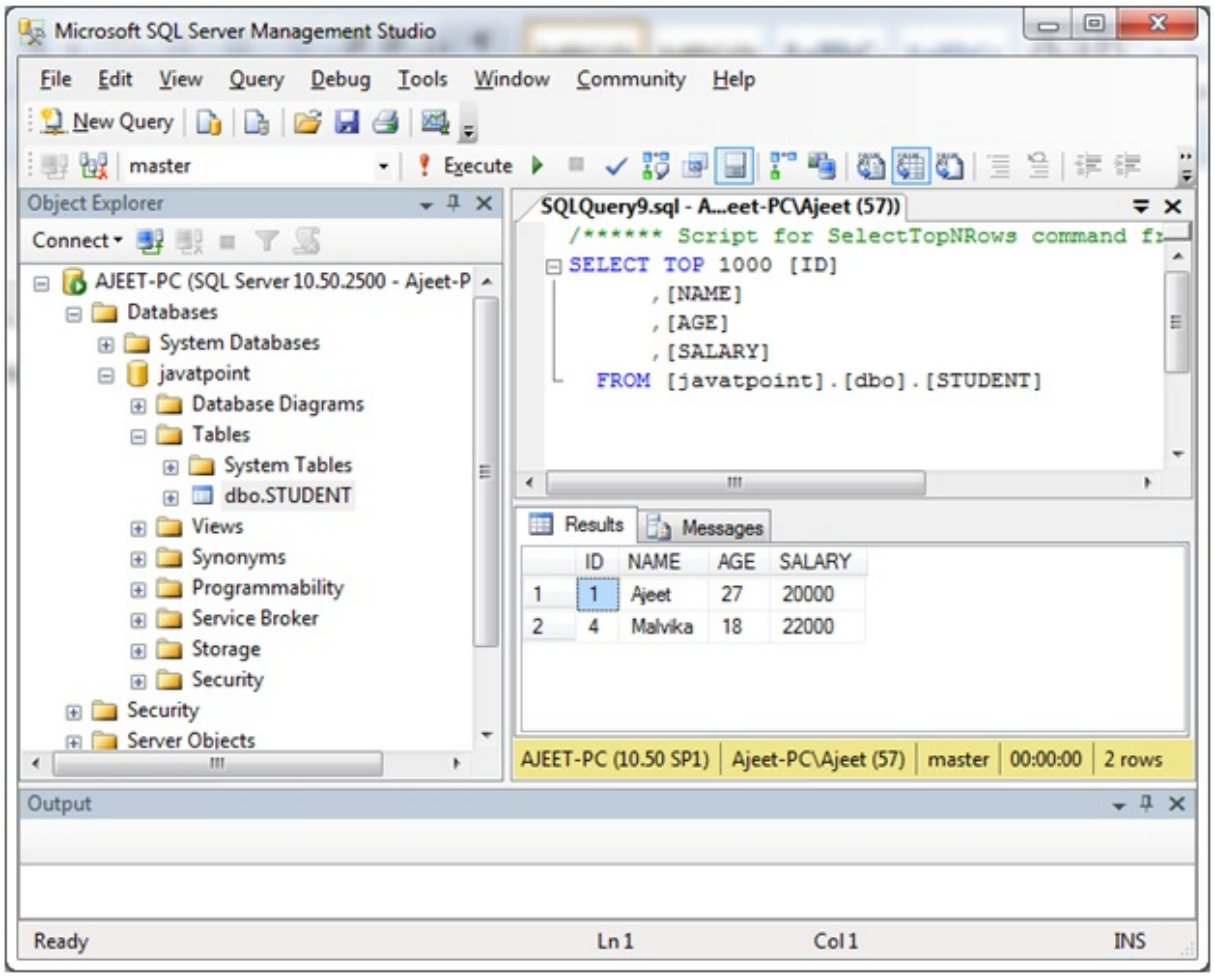
Follow the management studio screenshots given below:



Use the following command:

```
1. DELETEFROM [javatpoint].[dbo].[STUDENT]
2.         WHERE ID =3;
```



Here one row is deleted where ID=3. You can verify it:


Output:
